

AJEX SERIES

High Frequency Portable X-ray Generators

AJEX 9015H

It's real portable

compact

powerful

versatile

cost
effective

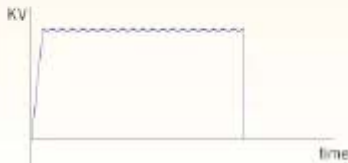

J-TYPE stand

Applying high frequency X-ray generator with constant potential output, the new model AJEX series provide improved image quality and reduced radiation dosage for patients and operators

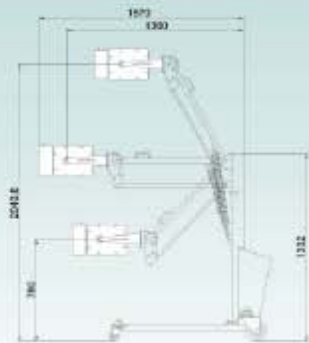

What's difference

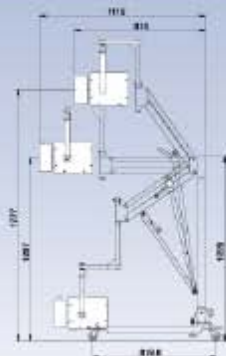

Conventional X-ray generator

H F X-ray generator

M-type stand
dual gas cylinders

J-type stand
disassemble structure for outdoor use
up/down by gear crank

V-type stand
wire rope with counter balancer

Features

- Applying high frequency inverter type generator (100kHz)
- Digital displays of kV, mAs and time
- Overload protection for kV, mA, Time and Temp
- Self-managible APR function with memory keys
- Soft touch user panel
- Wide range input power acceptable with electronic voltage compensator

Advantages

- Powerful output covering most radiographic technique
- Superb quality images with fine focal spot X-ray tube
- Excellent reproducibility not affected by line voltage fluctuation
- Reduced the hazards of X-ray radiation
- Prolonged lifetime of X-ray tube
- Ordinary wall-outlet power use

Specification

Subject to change without notices

Items	Models	AJEX 9015H
Max. output		1.35kW
Input Line Voltage		110V~220V, 1 Phase, 50/60Hz
Rating		50~90kV 0.3~45mAs (15mA Fixed)
Exposure time		0.02~2.0sec
Focal spot		1.2mm
Memory keys		4
B.L.D		50W
		Full field light beam type collimators with 30sec. timer
size(WxDxH)		165x290x215(mm) Exclude hand grip
Weight		7.9kgs
Carrying Case		Rigid Aluminium box
